CATTLE CO.

The Matrons of

MM

Produce the
Right Kind!

We invite you to

“The One”

March 20, 2010
Carrollton, Ga.

12 noon

The last few years we have been fortunate enough to have bred and produced some of the most competitive Angus heifers in the Southeast. These females have not only excelled in the show ring, but they have gone on and made functional cows in the pasture. We place an emphasis on sound, balanced trait cattle that not only look good but also perform and produce. After 30+ years of showing cattle and all the fads that we have been through, we are certain of one thing. The **“RIGHT KIND”** never go out of style! On March 20, look for maternal sibs and progeny by these females and more, sired by breed-leading sires.

Watch our website for more info on this year's offering!

Requirements for Calves to be GCCPA Tagged:

It's important that all members know the requirements for a calf to be tagged with the official GCCPA eartag. The rules are listed below:

1. Calves must be bred and born on a member's farm, or
2. Owned and born on other premises (example - you own a cow that is at an ET center in Georgia or another state), or
3. Calves are eligible from the purchase of bred cows or frozen embryos only if bred cows or embryos are purchased from another GCCPA member, and the new owner shall be listed as Breeder on the GCCPA point sheet.
4. Only dues paying members are eligible to purchase tags. (Exhibitors can not pay dues and buy tags for an individual they purchase the calf from.)

**Georgia Club Calf Producers Association
2010 Ear Tag Order Form**

Orders will not be taken over the phone and without prepayment.

How to Make A Rope Halter

Rope halters are easy to make. They are inexpensive, adjustable, useful in leading and tying, and are quite durable if kept dry. In making your halters, use good quality, three-strand manila rope. Use the table as a guide for selecting the right size and amount of rope.

Suggestions for leaders

- Make at least one halter yourself and be sure that you understand all of the steps *before* teaching your members.
- Show your members a completed halter and tell them its advantages. Let them decide if they want to make halters.
- Determine the size of the halters, and the size and amount of rope needed.
- Discuss whether or not the club wants to go to the store to buy rope.
- Have all members make their halters at the same time. Make one with them as an example.
- Take each step in turn. Tell and show members how to do each step. Stand so members can see and follow your hand movements.
- Let all members complete each step before starting the next.
- Plan for members to halter animals after completing the rope halter.
- Discuss the care of rope halters.
- Allow a junior leader or older club member to assist or instruct rope halter demonstrations.
- Remember, 4-H develops boys and girls. What they learn is more important than what they make.

Kind and size of animal	Size of rope (inches)	Length of rope (feet)	Nose piece* (inches)
Sheep, goats, small calves	1/4 to 5/16	8 to 10	8 to 9
Calves to 1 year	3/8 to 7/16	10 to 12	9 to 11
Yearlings and cows	7/16 to 1/2	12 to 14	11 to 13
Horses and bulls	1/2 to 9/16	13 to 16	14 to 16

*Add 3 inches to the proper nose piece length needed to start the loop described in Step 2 of *Adjustable halter* instructions. To assure properly fitting halters, measure the animal's nose for proper length of nose piece.

Halter and animal

Haltering an animal

To put a halter on an animal, adjust the size of the head stall, allowing slack in the chin strap. Take the lead and loop splice in your left hand, holding the nose piece and chin strap open, and the head stall in your right hand. Approach the animal from its left side, slip nose piece over the nose with the chin strap underneath; place head stall over the top of the head and back of the ears. Adjust head stall if necessary.

Securing the ends

Never let rope strands unravel. If they do, the rope is harder to work with and is not as strong. To secure the ends, first make a clean, square cut by placing the rope on a firm block and cutting with a sharp knife or axe. Secure the ends by either wrapping the rope (two or three turns) with friction tape about 1/2 inch from the end or whipping the ends with strong string.

Secure the ends

Care of the halter

Keep the halter dry and clean. Always hang it up when not in use.

Adjustable halter

Step 1. To make an adjustable halter for cattle, measure and cut off about 12 to 16 feet of rope. Lay it out in the manner shown below. At the end of the nose piece (A), attach rubber electrical tape to prevent raveling. Then measure from end (A) a length of rope about 14 to 16 inches long; make the loop for the lead rope to go through. For illustration purposes,

(A) will be the short end or nose piece.

Step 2. Open the rope at (C) and put the short end (A) through (B) at (C).

Step 3. Open rope (A) at (D) and put long end (B) through (A).

Step 4. Put (A) through (B) again at (E) and draw up tight.

Step 5. Take the end of (A), next to the tape, and twist it until three rope loops appear. Twist the three loops around until they are parallel to each other.

Step 6. Pull lead rope (B) through the three loops; take the long end of lead rope (B) and put it through the larger loop on the other side. The halter is now ready to use except for the end of the lead rope. Tape or splice the end of the lead rope.

Step 1

**Won \$350
Shown By:
Jenna
Hagler**

The 1st GCCPA steer show was held February 21st, 2009, in conjunction with the GA State Show. We had 135 steers in the show, showed steers in 3 divisions (British, Continental, and Commercial) and picked best three of show. Thanks to everyone who helped sponsor and work the show.

GCCPA breeders should be proud!

10 Bred Heifers, 3 of our best Donors, Pregnancies & Embryos

You can't keep a secret forever. . . Over the last 13 years our family has been meticulously building our cow herd through buying and breeding moderate framed, easy fleshing, good footed, attractive females that can get the job done in the Southern climate. Everyone that knows us knows that we demand perfection. The cows that reside here in Doerun must get the job done and be desirable to look at. We would now like to invite you back to the Farm on April the 9th and 10th . . . You can't keep a secret forever, sooner or later the great ones will leak out!

The Best Kept Secret Vol. II is now released . . .
